	<p>sunset, the scenery is always spectacular. Discover the hidden treasures the region has to offer and let your senses revel in Mother Nature's bounty. A contagious joie de vivre will enchant you from the first moment you arrive</p> <p>With seven championship-level golf courses in the area, Mont-Tremblant is also the ideal area for a golf getaway. Every level of golfer, playing for pleasure or performance, will find their match and play among some of the world's most beautiful vistas.</p> <p>Blueberry is also just a short drive from the charming Mont Tremblant resort, voted Eastern North America 's #1 resort for the past nine years. It provides guests with an abundant choice of restaurants to sample and boutiques to browse, plus great alpine skiing in the winter.</p> <p>Blueberry is surrounded by three of the most beautiful national parks in Québec.</p>
<p>Mont-Tremblant National Park</p>	<p>A vast universe of lakes and rivers set against a mountain backdrop, this park offers you freedom and the chance to get away from it all. Parc national du Mont-Tremblant provides a rich mixture of Québec's natural and historic heritage. It is the largest of Québec's parks and the first national park to have been created in the province. It offers a variety of activities and discoveries, with something for every taste. By canoe or on foot, skis or snowshoes, you'll be surprised by the sheer size of this natural playground. Parc national du Mont-Tremblant is open year round and is bound to make an unforgettable impression.</p>
<p>Papineau Labelle</p>	<p>Réserve faunique de Papineau-Labelle is a wonderful place for observing wildlife and offers attractive sites for the practice of many outdoor activities - including sports hunting and fishing. The rich and diversified vegetation creates conditions favourable to many kinds of native animals. Indeed, the reserve is home to populations of large white-tailed deer, moose and beaver. As for the many bodies of water, they are inhabited mainly by speckled trout and lake trout (salmon trout). A visit to the land of Louis-Joseph Papineau will reveal a world of tranquility and wonder, where the word "nature" reveals its true meaning.</p>
<p>Rouge Matawin</p>	<p>Straddling the Lanaudière and Laurentides regions, Réserve faunique Rouge-Matawin is characterized by a well-defined duality. The distribution of the two watersheds that supply water to this reserve adjacent to Parc national du Mont-Tremblant gives this territory two distinct characters: to the west, the sometimes spirited, sometimes lazy Rivière Rouge and its tributaries where speckled trout thrive; and to the east, the winding and mysterious Rivière Matawin and its tributaries</p>
